

### How to Order a List of Data:

#### (Section 2.2 – Practice with Example 1 from Lecture Notes)

- You are given a list of data in random order

Now in the calculator...

**STAT – ENTER** (to select 1:Edit)

In **L<sub>1</sub>** (List 1), enter the Data list. (Type a data value, then **ENTER**, then the next data value, then **ENTER**...)

**2<sup>nd</sup> – QUIT** (This gets you back to the 'Main' screen)

**STAT -- ↓ -- ENTER** (To select 2:SortA( )

**2<sup>nd</sup> – 1** (To type in **L<sub>1</sub>**) – **ENTER**

(Your screen should say: DONE)

**STAT – ENTER** (to select 1:Edit)

In **L<sub>1</sub>** (List 1), your list will now be in Ascending order.
